Fulton GB
has over 50 years of experience,
specialising in the design, manufacture,
installation, commission and aftersales support of steam,
hot water and thermal fluid systems for industrial,
commercial and medical applications.

Boiler Operator Training

Fulton's one-day training course, accredited by globally recognised City & Guilds of London satisfies the boiler operational training requirements of hundreds of clients.

The course bridges the gap between the more expensive courses that can cost thousands per employee - and straightforward 'toolbox' training.

training@fulton.co.uk

Globally recognised City & Guilds Certified training

Supports guidelines BG01 (SAFed)

Supports guidelines INDG-436 (HSE)

Extremely cost effective training

Both theory and practical assessments

Suitable for up to 8 operators

The course content includes:

- Steam principles and boiler operation in the form of a presentation
- Multiple choice test to confirm understanding of theory
- Practical operation of controls and test equipment using customers own boiler
- Observational assessment using test papers

City & Guilds | **Accredited Programme**

Water Treatment Training

Fulton's one day water treatment training course is in line with guidance note document BG04. This training is carried out on a clients site and up to 6 operatives can attend.

The course content includes:

- Reason for water treatment
- Pre-treatment methods
- Chemical treatment
- TDS and Blowdown
- Monitoring water treatment

Fulton water treatment test kit

Training in line with guideline BG04

Increase the lifespan of your equipment

Improve efficiency and management of cost

Maintain good steam quality

Cost effective with water treatment kit included

The water treatment site test kit includes:

- 1 off pH meter
- 1 off conductivity/TDS meter
- 1 off total hardness test reagents
- 1 off total alkalinity reagents
- 1 off P alkalinity reagents
- 1 off OH alkalinity reagents
- 1 off sulphite reagents
- 1 off set chloride reagents
- 1 off set phosphate reagents
- 1 off set calibration solutions
- 1 off comparator
- 1 off filter papers
- 1 off titration jar
- 1 off stirring rod

Boiler Maintenance Training

Fulton's one-day training course is an extension of the boiler operator course and aimed at staff dealing with ongoing basic boiler maintenance.

Training is carried out on site by an experienced engineer using customer equipment to ensure appropriate training is given and includes recommended preventative maintenance regimes as well as building on key foundation skills already obtained through our C&G training.

training@fulton.co.uk

Basic fault finding

Extension to boiler operator training

**Ongoing basic maintenance
(excluding combustion)**

Hands on training

Aftersales Support

Servicing & Maintenance

- Routine and reactive maintenance
- Support regardless of the OEM or system manufacturer
- Extensive network of service professionals

Spares - In Stock, On Time

- Over 6500 product lines
- Minimum 95% availability
- Same day or next day availability in the UK via TNT and DHL

Repairs, Conversions & Upgrades

- We specialise in:
 - Burner retrofits
 - Refractory repairs
 - D Patch/weld repairs
 - Tube replacements
 - Controls upgrades to increase your system's efficiency
