

Wickham Laboratories

Contract Analytical Services

Pharmaceuticals & Medical Devices Consultancy, Testing & Research Services

Wickham Laboratories is a GMP/GLP compliant laboratory with over 50 years of global experience in consultancy, research, microbiology and toxicology testing services for the pharmaceutical and medical device industries.

We conduct business with clients worldwide and the combined expertise of our laboratory technicians and managers enables us to be fully conversant with global regulatory expectations.

We are routinely inspected by the MHRA, FDA and Home Office, and offer the opportunity for clients to conduct audits on a regular basis.

Contract Analytical Services

MALDI-Biotyper® - Microbial Identification

Wickham Laboratories is now offering rapid microbial identification via the MALDI-Biotyper® or MALDI-ToF (Matrix Assisted Laser Desorption Ionisation-Time of Flight).

MALDI-ToF offers improved identification accuracy and compliance over traditional methods and reduces requirements for repeat testing. This rapid method can identify organisms to species level within minutes making same day identification a possibility.

Our prices for identification are competitive and may include volume discounts. For any organism not matching those present in our database, we will also provide an identification free of any additional charges. Please see our Terms & Conditions for further details.
